JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids, and is issued in four parts per volume.

EDITORS

PROF. G. K. BATCHELOR, DR H. K. MOFFATT

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge, England

ASSISTANT EDITORS

DR F. P. BRETHERTON, DR M. D. COWLEY

ASSOCIATE EDITORS

PROF. G. F. CARRIER

Pierce Hall, Harvard University, Cambridge 38, *Massachusetts, U.S.A.*

DR W. C. GRIFFITH

Lockheed Missiles and Space Company, Palo Alto, California, U.S.A.

PROF. M. J. LIGHTHILL

*Royal Society Research Professor, Imperial College, London, S.W.*7, *England*

PROF. J. W. MILES

Institute of Geophysics and Planetary Physics, University of California, La Jolla, California 92038, *U.S.A.*

PROF. O. M. PHILLIPS

Department of Mechanics, The Johns Hopkins University, Baltimore 18, *Maryland, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The subscription price for a volume of four parts is £6. 10*s*. net, post-free, payable in advance; separate parts £2. 2*s*. 6*d*. net, plus postage. Subscriptions may be sent to any bookseller, or to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

Subscribers in the United States should send their orders to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022. The subscription price per volume is $22.50, post free, payable in advance; separate parts $6.75, plus postage.

Quotations for available back volumes and parts may be obtained on application to the Cambridge University Press.

(University of London)

Research Fellowship in Biomechanics

Applications are invited for the post of Research Fellow in Biomechanics.

The successful applicant will be a member of a group investigating problems of blood flow; preference will be given to candidates who are graduates in engineering or physics with special knowledge of fluid mechanics. Laboratory facilities will be provided at King's College Hospital Medical School and at the University of Surrey. Tenure of grant up to three years, with the possibility of extension.

Salary according to experience and status up to £2,000 plus the usual superannuation benefits.

Opportunities for registering for higher degrees exist. This post is part of the long-term collaborative scheme between the above two Institutions in the field of Biomechanics.

For further details apply to Professor J. M. Zarek, Department of Mechanical Engineering, University of Surrey, Battersea Park Road, London, S.W. 11.

Take advantage of opportunities with
WYLE LABORATORIES RESEARCH STAFF
in the field of
FLUID MECHANICS

WYLE LABORATORIES requires additional Research and Consulting Staff for Advanced theoretical and experimental work in fluid mechanics and acoustics

- Boundary Layer Studies
- Compressor, Fan and Helicopter Noise
- Digital Data Reduction Techniques
- Free Shear Flows
- Noise from Jet and Rocket Engines
- Shock Generation and Propagation
- Seismic Studies
- Turbulence
- Underwater Acoustics
- Unsteady Gasdynamics

WYLE tries to maintain something of the atmosphere of a University Research Department, and each staff member is free to expand in his own technical area. Our acoustical experimental facilities are unusually large, and our on-line digital data reduction system offers a unique opportunity for original experiments.

WYLE LABORATORIES RESEARCH STAFF is located in Huntsville, Alabama and Los Angeles, California. Positions are available at both facilities. A higher degree or several years' relevant experience is preferred.

Send your résumé in confidence to:

K. McK. Eldred
